

Steps taken by the institute to contain the transmission of COVID19

- Introduction of hand washing facilities outside all entry gates
- Spacing lines to ensure social distance
- Implementation and display of COVID appropriate behaviors in all areas.
- Introduction of screening desk for early identification of suspected case of COVID19
- Spacing of OPD chairs to increase social distancing
- Increase in number of exit gates and pharmacy counters to minimize queue
- Preparation of an isolated zone for detail screening and referral to IDSP for the suspected patients
- Health workers are delivering their duties wearing PPE kit
- Preparation of an isolated zone to accommodate the suspected patient.
- IEC displays to increase awareness regarding COVID19
- Awareness sessions to educate staff and patients about COVID19
- Frequent sanitisation of the wards.
